What is SmartSMS?

VNES SmartSMS is a complete supermarket management system, which is suitable for a wide range of supermarket. Especially, SmartSMS is the first Vietnamese software system that support multi-location model of a chain of supermarkets.

Along with many powerful functions which were carefully designed and implemented, SmartSMS has an integrated accounting system and a built-in warehouse and inventory management application that make SmartSMS capable of fulfilling every management task in a multi-language and multi-user working environment with friendly customizable graphical user interface.

Functions of SmartSMS

The SmartSMS system consists of three applications: Sales Management, Accounting, and Warehouse & Inventory Management. Each application has several modules with hundreds of functions. Below are a few details of the functions in these modules.

Administration Module

Administer groups, users & permissions

- Two-level security system: database & application levels.
- Record application user information
- Grant permissions to appropriate types of user
- Export data to many formats: text, worksheet, other database formats, etc.
- Periodically back-up and restore database

Sales Management Application

Administer all transactions at a branch

- Keep track of each salesperson at each counter
- Disable any key that is not necessary
- Auto-shutdown PC if program was terminated
- Password-protected screen-saver mode
- Support many types of discount
- Schedule promotion programs
- Accumulate customer purchase for promotion programs
- Support inputting from barcode devices
- Specify VAT rates on receipt: 0%, 5%, 10%, etc.
- Issue receipt with many detailed information
- Back-up receipt in text format
- Modify receipt based on permission

Integrated Accounting Application

Completely perform all accounting tasks

- Master list administration:
 - Accounts system
