## INTRODUCTION

■ Founded in June, 2002, VNES is an IT company specializing in advanced business management software and e-commerce solutions. In this era of information, we're proud to be one of the top innovative software providers, to actively contribute to the development of knowledge-base economy and e-commerce in Vietnam.

Possessing experienced, dynamic and creative project management and development teams, VNES is committed to provide customers with high quality and cost-effective products that meet all of specific requirements. Our goal is not only to bring the highest standards, but also the trust and pride to each of our valued customers when they are using any of our products and services.

We are aiming to be a credible solution provider in Vietnam and other countries in the region. VNES products will be competitive with others' over quality and professional support services, so customers could be benefited from our investment and development. ■

## OUR VISION

■ In order to keep our leading position in the competitive market and the rapid development of IT industry, we have invested and built our own working environment, which is suitable for scale and requirements of Vietnamese enterprises. Our goal is to reduce implementation time and customers' expense while giving them solutions with highest quality. This is the most superior feature of VNES solutions.

Thanks to our "Smart Automatic Rapid Application Development - SaRAD" technology, we will quickly transform client's current management model into software solution with minimum risk and expense, giving our customers maximum benefits of digitization and systematization.

**The "Top 5 Software Companies" award at National SoftMart 2003, is the true reflection of the credibility and quality of VNES solutions, expressing the commitment to serve our customers with the best products. ■**

# BASIC FEATURES OF VNES' SOLUTIONS

## BASIC FEATURES OF VNES' SOLUTIONS

■ We are fully aware that customers have different requirements. We work closely with customers to thoroughly understand all their market targets, their clients, and their business and management rules. With extensive experience and ability to utilize appropriate development model, we provide customers with perfect solutions that satisfy every specific requirement.

Our software are built upon the 3- tier (or n-tier) application model with object-oriented programming method (OOP). Thanks to this, our software have error-free and stable structure, high credibility, openness, and are easy to be maintained and upgraded.

VNES solutions always employ latest standards and technology of giants in IT industry such as Microsoft, Oracle, Sun, IBM, Borland, Rational, etc. making our software superior than others, and helping us to keep the leading position in utilization of cutting-edge technologies in our software development process. ■
